Matthew Schuppel

CLINICAL OPERATIONS AND TEAM DEVELOPMENT

Dallas, TX | 269-568-8014 | matthew@matthewschuppel.com | matthewschuppel.com

Biomedical engineer with 4+ years of experience in medical devices and clinical site operations. Developed employee onboarding plans and trained new team members and clinical staff at two companies. Experience includes activating 20+ U.S. clinical sites, independently coordinating nationwide support, and owning internal projects in collaboration with clinical, R&D, and quality teams.

PROFESSIONAL EXPERIENCE

Clinical Application Specialist
Apr 2024 - Present

Carthera Inc.

- Activated and onboarded 20+ U.S. clinical sites, coordinating initial training and maintaining site relationships through ongoing procedures and treatments.
- Independently coordinate nationwide on-site and remote support, prioritizing site needs and resolving technical issues with minimal supervision.
- Identify operational needs and take ownership of internal projects; created training procedures and tools to support site onboarding, team coordination, and clinical trial logistics.
- Lead device demonstrations and training for neurosurgeons, nurses, oncologists, and other clinical staff, providing guidance during implantations and activations.
- Partner with R&D on device development and quality assurance on complaints and technical follow-up. Maintain training records and technical documentation to support consistent site practices.

Clinical Support Engineer
Feb 2022 - Apr 2024

Renishaw Healthcare Inc.

- Provided on-site and remote guidance to surgical teams, with weekly travel supporting sEEG, deep brain stimulation (DBS), and laser interstitial thermal therapy (LITT) workflows.
- Coordinated robotic system installations and delivered in-service training, preparing clinical teams to operate and care for stereotactic neurosurgical technology.
- Coordinated preventive maintenance across the installed base and resolved hardware and software issues; documented service activities and corrective actions for quality management.
- Assessed clinical needs and conducted device demonstrations and customer evaluations to support sales opportunities. Represented the company as a technical resource at neurosurgical conferences.

LEADERSHIP AND OPERATIONAL SKILLS

Leadership: Employee onboarding, peer training, cross-training, project ownership, cross-functional coordination

Operations: Clinical site activation, nationwide field support, training procedures, internal tool development, technical issue resolution

EDUCATION

B.S. in Biomedical Engineering
2021

University of Oklahoma

Available for up to 100% travel | Open to select relocation opportunities
